Re: Final Report for Saratoga Horticultural Research Endowment Grant:
“Edit and Publish Percy Everett’s A Summary of the Culture of California Plants at Rancho Santa Ana Botanic Garden, 1950-1976.” Note that the final title of this volume has changed to more accurately reflect the content of the document: “A Second Summary of the Horticulture and Propagation of California Native Plants at the Rancho Santa Ana Botanic Garden, 1950-1970.”

Dear Dr. Burger and Dr. Dodge,

I am very pleased to inform you that our work has been completed on Percy Everett’s manuscript, “A Second Summary of the Horticulture and Propagation of California Native Plants at the Rancho Santa Ana Botanic Garden, 1950-1970.” The first version (1.0) of the manuscript was posted on the Rancho Santa Ana Botanic Garden (RSABG) web site on February 29, 2012. A second version (1.1) was posted on March 7, 2012. And the current version (still labeled version 1.1) was posted on March 14, 2012. This version can be found on the RSABG web site, under the research heading, and then under the scientific publications heading. For direct access to the current version, please use this web link:

https://saveplants.org/wp-content/uploads/2017/12/everett_1_1.pdf

As is stated on first page of this document, RSABG intends to publish a limited run print edition of this work later this year.

The Saratoga Horticultural Research Endowment is acknowledged on page 8 of the document, in the Editor’s Introduction. We are very grateful to the SHRE for providing the necessary funding to complete this valuable work and to make it available to researchers and California native plant enthusiasts around the world.

With many thanks,

Bart O’Brien
