

NOT JUST A DROP IN THE BUCKET

LANDSCAPE WATER SAVING IRRIGATION STRATEGIES

Learn how to maintain your landscapes and reduce water use by improving water management and system efficiency. This workshop features indoor presentations and outdoor demonstrations on the following topics:

TOPICS

- Understanding precipitation rates (PR) to mitigate water & pesticide runoff
- Improving sprinkler distribution uniformity (DU) to reduce water use
- Improving controller programs to reduce and manage water use
- Determining application rates and PR of drip/micro irrigation
- Understanding and reading water meters to improve irrigation efficiency
- Irrigation management of urban trees in drought

WHEN

Thursday, May 19th 8am - 12 noon

WHERE

Modesto Centre Plaza- Stanislaus & San Joaquin Rooms
10th & K St., Modesto, CA 95354
